

PITOT CHANGE-OUT KIT

USER GUIDE

Item#: PCK

OVERVIEW

The Pitot Change-out Kit simplifies the job of changing out a Hose Monster® pitot. The 1/8" hex socket tool is used so that removing, installing, and adjusting the setscrew is done with ease. The magnet is used to keep from losing the spring and pin.

COMPONENTS

- 1/8" x 6" long hex wrench with socket drive
- Rectangular ceramic magnet

INSTALLING THE PITOT

Refer to the user guide included with the Pitot Replacement Kit (Item#: HMP) or Pitot Rebuild (Item#: HMPR).
